Allied Telesis SwitchBlade x8100 Series Advanced Layer 3+ chassis switches are designed to deliver high availability, wire-speed performance, and high port count. Two control card options, CFC400 and CFC960, provide solutions for medium and large networks. The ability to power two chassis in a single chassis using CFC960 ensures a powerful and reliable network solution, which can be distributed over long distances.

Характеристики

Количество портов	12
Функционал	Уровень 3 Plus
Тип устройства	Коммутаторы в виде модульного шасси
